KEY PARTNERS

Ja-Square has developed and delivered a unique expertise in integrated service platforms for major operators and clients with our major global partners

At Ja-Square, we always strive for updating and developing our products and services. Our highly qualified professional team focuses on quality and ease while improving our products and services. This is done in order to let these services be handled by all people of different ages and abilities, thus promoting a smarter, easier, healthier, and eco-friendly lifestyle. Therefore, we can maintain an unconventional contemporary approach to handle the world from your place just by using your smart device.

Being a French-based company, we provide European-based standards all over the MENA region at much lower prices than our competitors, with higher quality and standards, which places us at a competitive advantage. However, at Ja-Square we never sacrifice the quality or the security of the data being gathered and transferred throughout our solutions and applications. Data exchange is the driving factor of IoT Communications, whereby privacy of data is a very critical aspect to be considered in adapting digital

FUTURE VISION

Ja-Square is highly involved in the telecommunication industry and always aims to make consumers' lives easier. We focus on the smartest and most innovative solutions and work towards extending our reach to cover all types of technologically oriented users. To do this, our objective is to always create user-friendly products and services in need of minimal maintenance, with exhaustive customer support readily available for assistance and repair. Ja-Square caters for all the pillars of society and for all industrial levels ranging from the raw material providers to the end-consumers, and is dedicated to adopt a fully-fledged solution from start to end in order to ensure a holistic and well-rounded solution, which enhances the robustness of our solutions provided.

The digitization process is continuously booming, and we are contributing our efforts on this front by constantly seeking new innovative solutions, both for the public and private sectors. Our efforts are extensive and benefit the overall business environment in the region. Our talented team works tirelessly on multiple simultaneous projects to provide the best and most needed solutions for all customers.

Ja-Square is dedicated to provide operators and governments with novel and up-to-date solutions that assist them in enhancing their quality of service, adhering to the global standards, and largely diversifying their portfolio. This is made possible through a dedicated team that is equipped with the latest systems to adopt the latest technologies and products in the market in a timely manner and examine the feasibility of those solutions within the market studied.

We store such data in the most secure cloud systems and datacenters to enhance secure data exchange and processing. Each communication signal should be encrypted before transmission so that integrity of data is maintained and can only be decrypted by the intended receiver. This conforms with the medium and country whereby the solution is implemented and adopted.

In our future endeavors, we hope to successfully be able to further enhance the societal well-being in terms of providing accessible and green technologies. This is made possible due to our commitment to our vision and mission, granting the people, no matter their age and abilities, new accessible technologies that enhance their day to day activities and facilitate their daily lives.
